PROFESSIONAL SUMMARY

Detail-oriented Software Developer with professional experience building responsive, scalable web applications, RESTful APIs, and database-driven solutions. Proven expertise in **React.js, JavaScript, and TypeScript** on the front end, alongside robust backend development using **Java, Spring Boot, Node.js**, and relational database systems (**PostgreSQL, MySQL**). Possesses strong foundational knowledge of **C# and .NET Core** architectures. Dedicated to clean, maintainable code, rigorous debugging and root-cause analysis, proactive code reviews, and Agile teamwork.

TECHNICAL SKILLS

Frontend & Web: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend & APIs: Java, Spring Boot, Spring Framework, RESTful API Development & Integration, Node.js, PHP, Laravel, C# & .NET Core (Foundational)

Databases & Storage: PostgreSQL (schema design & query optimization), MySQL, MongoDB, SQLite, SQL queries & relational modeling

DevOps, Cloud & Tools: Git, GitHub (Version Control, Branching, PRs), Docker containerization, AWS, CI/CD, Postman, VS Code

Engineering Practices: Root-Cause Analysis & Debugging, Clean Architecture, OWASP, JWT, OAuth 2.0, RBAC, Unit/Integration Testing, Agile/Scrum

PROFESSIONAL EXPERIENCE

Associate Software Engineer — Amazoft IT **December 2025 – Present**

- Architect and maintain production web features using React.js, TypeScript, and REST APIs, ensuring modularity and optimal browser performance.
- Design and optimize relational SQL schemas and indexing strategies in PostgreSQL, ensuring data integrity, minimal latency, and high query throughput.
- Conduct rigorous debugging, log analysis, and root-cause diagnostics to resolve defect tickets and improve overall application stability.
- Collaborate in Agile sprint planning, daily scrums, and thorough peer code reviews via Git/GitHub to uphold clean code standards and test coverage.

Trainee Software Developer — Amazoft IT **June 2022 – December 2025**

- Developed responsive user interfaces with HTML5, CSS3, and React.js while supporting RESTful API services built with Java and Spring Boot.
- Implemented secure token-based authentication (JWT, OAuth 2.0) and Role-Based Access Control (RBAC) following secure coding guidelines.
- Assisted in containerizing multi-service components using Docker, preparing reproducible builds, and deploying services to AWS test environments.
- Authored comprehensive Postman test collections and unit test suites to validate API endpoint contracts and regression stability.

KEY PROJECTS & DOMAIN EXPERIENCE

School Management System (EdTech Platform) *PHP, MySQL, JavaScript, HTML5, CSS3*

- Engineered role-based portals (Admin, Teacher, Student, Parent) with modules for attendance tracking, grading, timetables, and notification alerts.
- Modeled normalized MySQL relational databases ensuring transactional reliability, granular permissions, and dynamic reporting analytics.

nipuneX – AI-Driven Recruitment Platform *Next.js, React.js, Node.js, PostgreSQL, AWS*

- Developed high-speed user interfaces in Next.js/React.js integrated with REST endpoints for talent filtering and automated candidate assessment.
- Integrated AWS cloud services and PostgreSQL database queries, achieving sub-second response times for complex applicant searches.

Employee Attendance & HR Management System / POS & Inventory *Java, Spring Boot, PostgreSQL, Docker, REST APIs*

- Built attendance and shift tracking microservices with strict RBAC; engineered transactional POS sales, GRN, and real-time inventory logic.

EDUCATION & QUALIFICATIONS

BSc (Hons) in Software Engineering — Cardiff Metropolitan University, United Kingdom **Second Class Upper Division (2:1)** | **2025 – 2026**

Higher Diploma in Computing & Software Engineering — Cardiff Met. (via ICBT Campus, Sri Lanka) **Merit / Distinction** | **2023 – 2025**
